CATALOG OF

LYDD
FLOORWALL
TILE CO.

KANSAS CITY, MISSOURI

A glance through the pages of this catalog

will indicate that the greatest care and every effort has been made to give you all the information you need before ordering. It will also convince you of our exceedingly DEEP CUT PRICES. You can buy genuine tile from us at lower prices than what tile substitutes are sold for. These low prices together with the high quality of our tiles result from the fact that we are the largest dealers in this material. All our tile is made on honor in factories long known for

their superior products. Other reasons for our extra low deep cut prices are because of our terms, which are cash with order. For over thirty years it has been our policy to sell for cash and it has proven a hundred percent successful. We make no exceptions, these are the terms to all our customers, so when sending your order we ask you to remember this. If you send your order not accompanied by check, it will be necessary to write reminding you of our terms; therefore avoid these delays by complying with our terms at time order is mailed us. If for reasons which may be more convenient, you may send with order a check for on or about 50% of the amount of order and material will be shipped C. O. D. for the balance.

All our tile is carefully packed and freight rates are very low, because, our factories are centrally located, most of them in Ohio.

Whether you are a tile contractor, now engaged in the business, a tile setter planning to engage in the tile business or a general building contractor, it is not necessary to carry a stock or to keep your capital invested, because, we make PROMPT shipments. When you are awarded a contract, send us your order for the necessary amount of tile for that job, and within a short time you will be in receipt of the tile.

All quotations herein are F. O. B. Factories in Ohio and subject to change.

In Business over 30 Years

SAMPLES FREE

Subject to Following Conditions

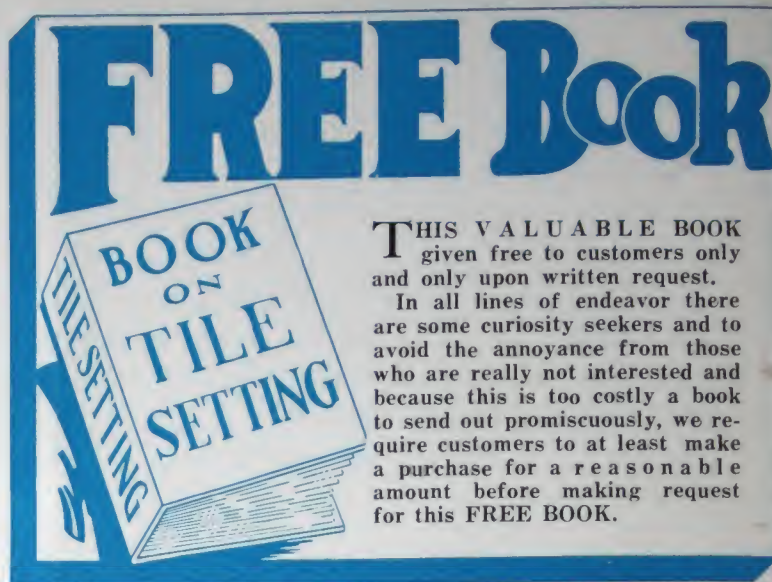

TO AVOID the annoyance and expense of sending samples to disinterested persons, we require a deposit of \$5.00 for which we send prepaid, a representative line of samples. After customer has made an initial purchase of a reasonable amount we refund the \$5.00.

A very complete line of samples, including almost everything shown in this catalog (no Bathroom Fixtures) will be sent prepaid for \$10.00. This amount also will be refunded with first purchase exceeding One Hundred Dollars.

Every person or firm engaged in the Tile Business or if

proposing to embark in the business should have a representative line of our samples. True, you can very often close contracts by simply showing your clients the pictures in this catalog. You will find, however, some clients like to see and feel the tile before they choose color, size or style.

Samples enable your clients to better picture in their mind what you propose to them. These samples will enable you to close contracts running in to thousands of dollars. It all depends on how much you apply yourself to this most interesting and profitable branch of the building trades.

THIS VALUABLE BOOK given free to customers only and only upon written request.

In all lines of endeavor there are some curiosity seekers and to avoid the annoyance from those who are really not interested and because this is too costly a book to send out promiscuously, we require customers to at least make a purchase for a reasonable amount before making request for this FREE BOOK.

C-122 45

TILE is now the accepted material for walls and floors of all modern buildings. For the home, tiles have been a long felt need. They provide an excellent background for all kinds of furnishings in such places as walls, porticos, sun parlors, etc.

For kitchens, bathrooms, butler's pantries, they cannot be equaled. Tiles with their rich colorings, delicate tints, warm tones and harmonious finishes combine charming effects that have won the whole-souled admiration of women.

Unlike any other wall or floor, they are practically impervious to wear, retain their original colors, and can be had in such a multitude of colors, shapes and sizes that any taste, no matter how fastidious, can be suited, any decorative scheme can be matched, any desired effect can be created.

The servantless problem has served to enhance the value of tile walls and floors. They are impervious to moisture and do not absorb dirt nor discolor. With ordinary care they last indefinitely and retain their newness forever.

In the following pages we show some beautiful tiles in many styles, colorings and designs, to fill any possible demand.

SHIPPING INFORMATION

NOTE—In absence of definite instructions we ship by rail, freight, boat, express or parcel post, whichever we consider most advisable.

Delivery to Carrier

ALL goods are carefully inspected and packed, and delivered to transportation company in perfect order. When we receive receipt from transportation company our responsibility ceases, and the shipment becomes the property of the purchaser. Breakages, loss in transit, delay in delivery, are beyond our control, and all claims must be made on the carrier.

Full Count

We guarantee full count, and invoice quantity as actually delivered to carrier.

Specific Jobs and Stock Orders

This Company does not accept any liability for failure or inability to supply tiles ordered. All orders for specific jobs are accepted on the condition that we are not to be held responsible for events beyond our control. All orders from stock or future

delivery are accepted with the distinct understanding that they will be shipped at our prices current on date of shipment. Orders cannot be cancelled without our consent.

Always Quote Pattern Number

We particularly desire our patrons, when sending in orders, to always quote our pattern number to avoid errors, as in no case will we be held responsible for errors in ordering, nor can goods be taken back or deductions allowed unless the fault is clearly ours.

Color Variations or Shades

Color variations or shades are incidental to, and inherent in, all burned clay products. Shipments are made with the distinct stipulation that no claims arising from color variation will be allowed after the material is installed. No tiles guaranteed against crazing.

Terms In Which Tile Men Talk

Bases—The wash board or the bottom course of the wall.

Bead—A. Quarter round.

B. Combination quarter rounds.

C. Small fillet or moulding.

Bisque or Biscuit—Body of tile, the unglazed ware.

Broken Joint Work—Setting of tile in such a manner that the vertical joint formed by two tiles in one course is directly in the center of the tile in the upper or lower course.

Bull Nose—Combination quarter round.

Butterfly Angle—A window or door corner or angle.

Caps—The top of the wainscoting or finishing member which returns to the plaster line. Caps can also be the band course to outline the wainscoting.

Ceiling Cove—Used to round off the corner formed at the intersection of walls and ceiling.

Combination Angle—A cove or quarter round, but convex or concave, and a flat tile in one piece.

Combination Angle Cove—Another term for combination angle, but in concave only.

Convex Angle—An outside angle.

Concave Angle—An inside angle.

Corner—An angle piece which joins the vertical and transverse sections of a trimmer.

Corner Bead—Another term for quarter round.

Course—The straight lay of any lie of tile.

Cove—A concave quadrantal tile of any radius.

Cove Base—A base with a cove at the bottom to meet the floor.

Curb—Various shaped tiles used for curb in shower baths and round hearths.

Down Angle—(See Down Corner.)

Down Corner—An angle piece which changes the direction of a trimmer from the horizontal to a downward vertical direction in the same plane. Other terms for this shape are Outside Vertical Angle, Door Angle, and Top Intersecting Angle.

Flange—(1) The straight part.

(2) Tangent of a Combination.

(3) Cap or base.

Flange (Down)—To be laid on the floor.

Flange (Up)—To be laid on the wall.

Mouldings—Decorative members used to enrich tiles, for paneling and framing, and for building up cornices.

Nosing—See Quarter Round Combinations and Partition Tile.

Outside Angle—A connecting piece which changes the direction of a trimmer at salient angles. (See Convex or Interior Angle.)

Outside Glaze—A term used in connection with double-faced patterns indicating that the Convex side of the piece is glazed.

Plinth—Square or beveled block at base of a door architrave or trim.

Quarter Round—A convex quadrantal tile of any radius.

Radius Tile—A tile to follow the form of a circle of any radius.

Recess Cove—A tile forming the jamb of the window, with a cove attached.

Hand Hold—Used in Roman or Turkish baths or swimming pools—part of the gutter or for hand grip.

Hand Rail—A half-round tile used as above or top of curb.

Inside Angle—A connecting piece either rounded or square, which changes the direction of a trimmer at re-entrant angles (See Concave Angle.)

Inside Glaze—A term used in connection with double faced patterns, indicating that the concave side of the piece is glazed.

Stretcher—The running piece of any moulding or base.

Shoe—A small cove with a flange on one side.

Stop—The turning of a moulding on cap or base, to a plain surface, to overcome projection where it connects with a door or window trim.

Straight Joint Work—Where the vertical and horizontal lines run through the course.

Up Corner—(See Vertical Angle.)

Vertical Angle—An up and down corner or angle—a piece which changes from horizontal to a vertical direction.

Window Cove—Any combination angle tile used around a window. (See Recess Cove.)

Approximate Weight of Tile When Packed Ready for Shipment

Ceramic Floor Tile—Sizes 3/4" square; 1" Hexagon 3/4"x1 1/2" Oblongs or any other shapes or sizes of Tile in this class 300 pounds per hundred square feet.

Plain Wall Tiles—Size 6"x3" and 4 1/4"x 4 1/4", 450 pounds per hundred square feet.

Round Top Base—Size 6"x6", 160 pieces, 275 pounds.

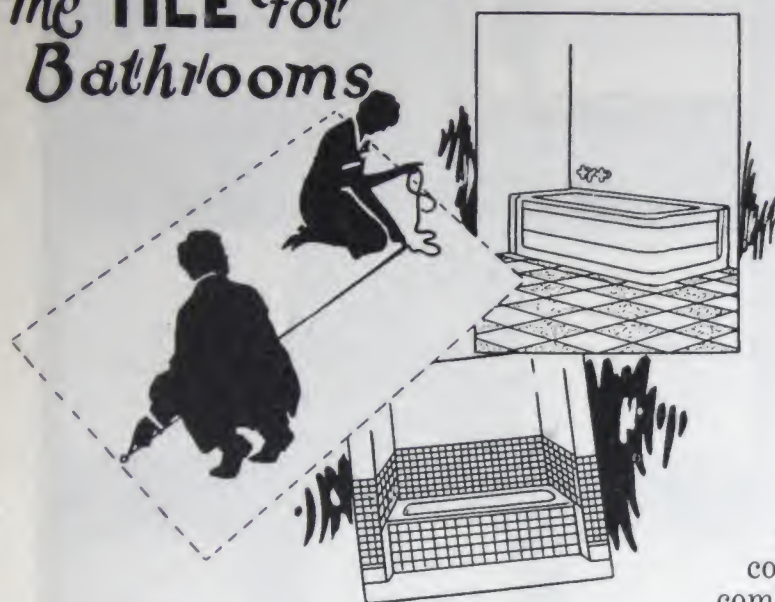

Cap—Size 6"x2", 650 pieces, 300 pounds.

From above information you can obtain a very good idea of what the approximate shipping weight may be on almost any kind of Tile you are interested in.

For shipping weights of Quarry Tile in their various sizes, see Page 25.

Allow Us to Assist You - - -

Planning The TILE For Bathrooms

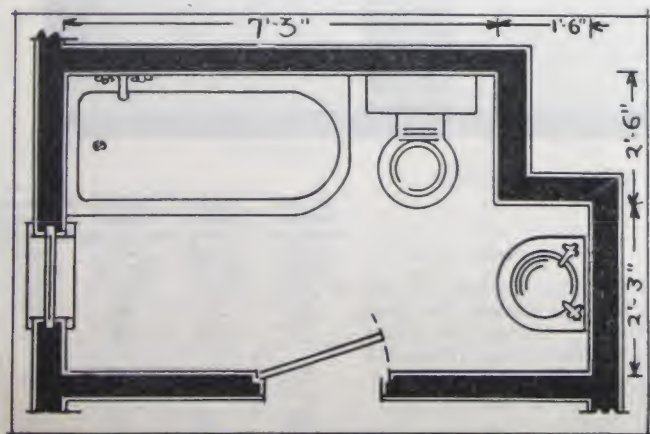

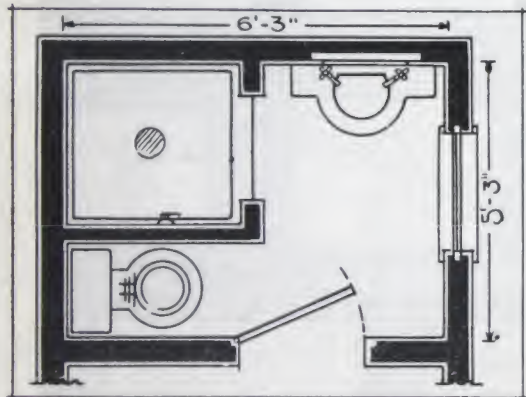

Our Estimating Department
is Always at Your Service

IF FOR some reason or other you are unable to figure quantities of tile that is necessary, do not hesitate to mail us your sketch.

A reasonably good floor plan sketch similar to those shown to left is sufficient, with which indicate doors and windows or other spaces that will not require tile—However, when possible, we suggest that you furnish us in addition to floor plan, also sketches of wall elevations. This sort of sketch enables us to estimate exact quantity of tile that is necessary for the wall and floor, also exact number of pieces of trim, such as in and out corners for cap, in and out corners for base, stops, combination out angles for upright corners and curbs of shower jams, window sills, etc.

From illustrations in this catalog, select style of cap and cove or base wanted, also size of wall tile and state whether you want estimate on white glazed wall tile and white trimmers, white tile with black trimmers or colored wall tile with trimmers to match and state what design of floor tile is wanted.

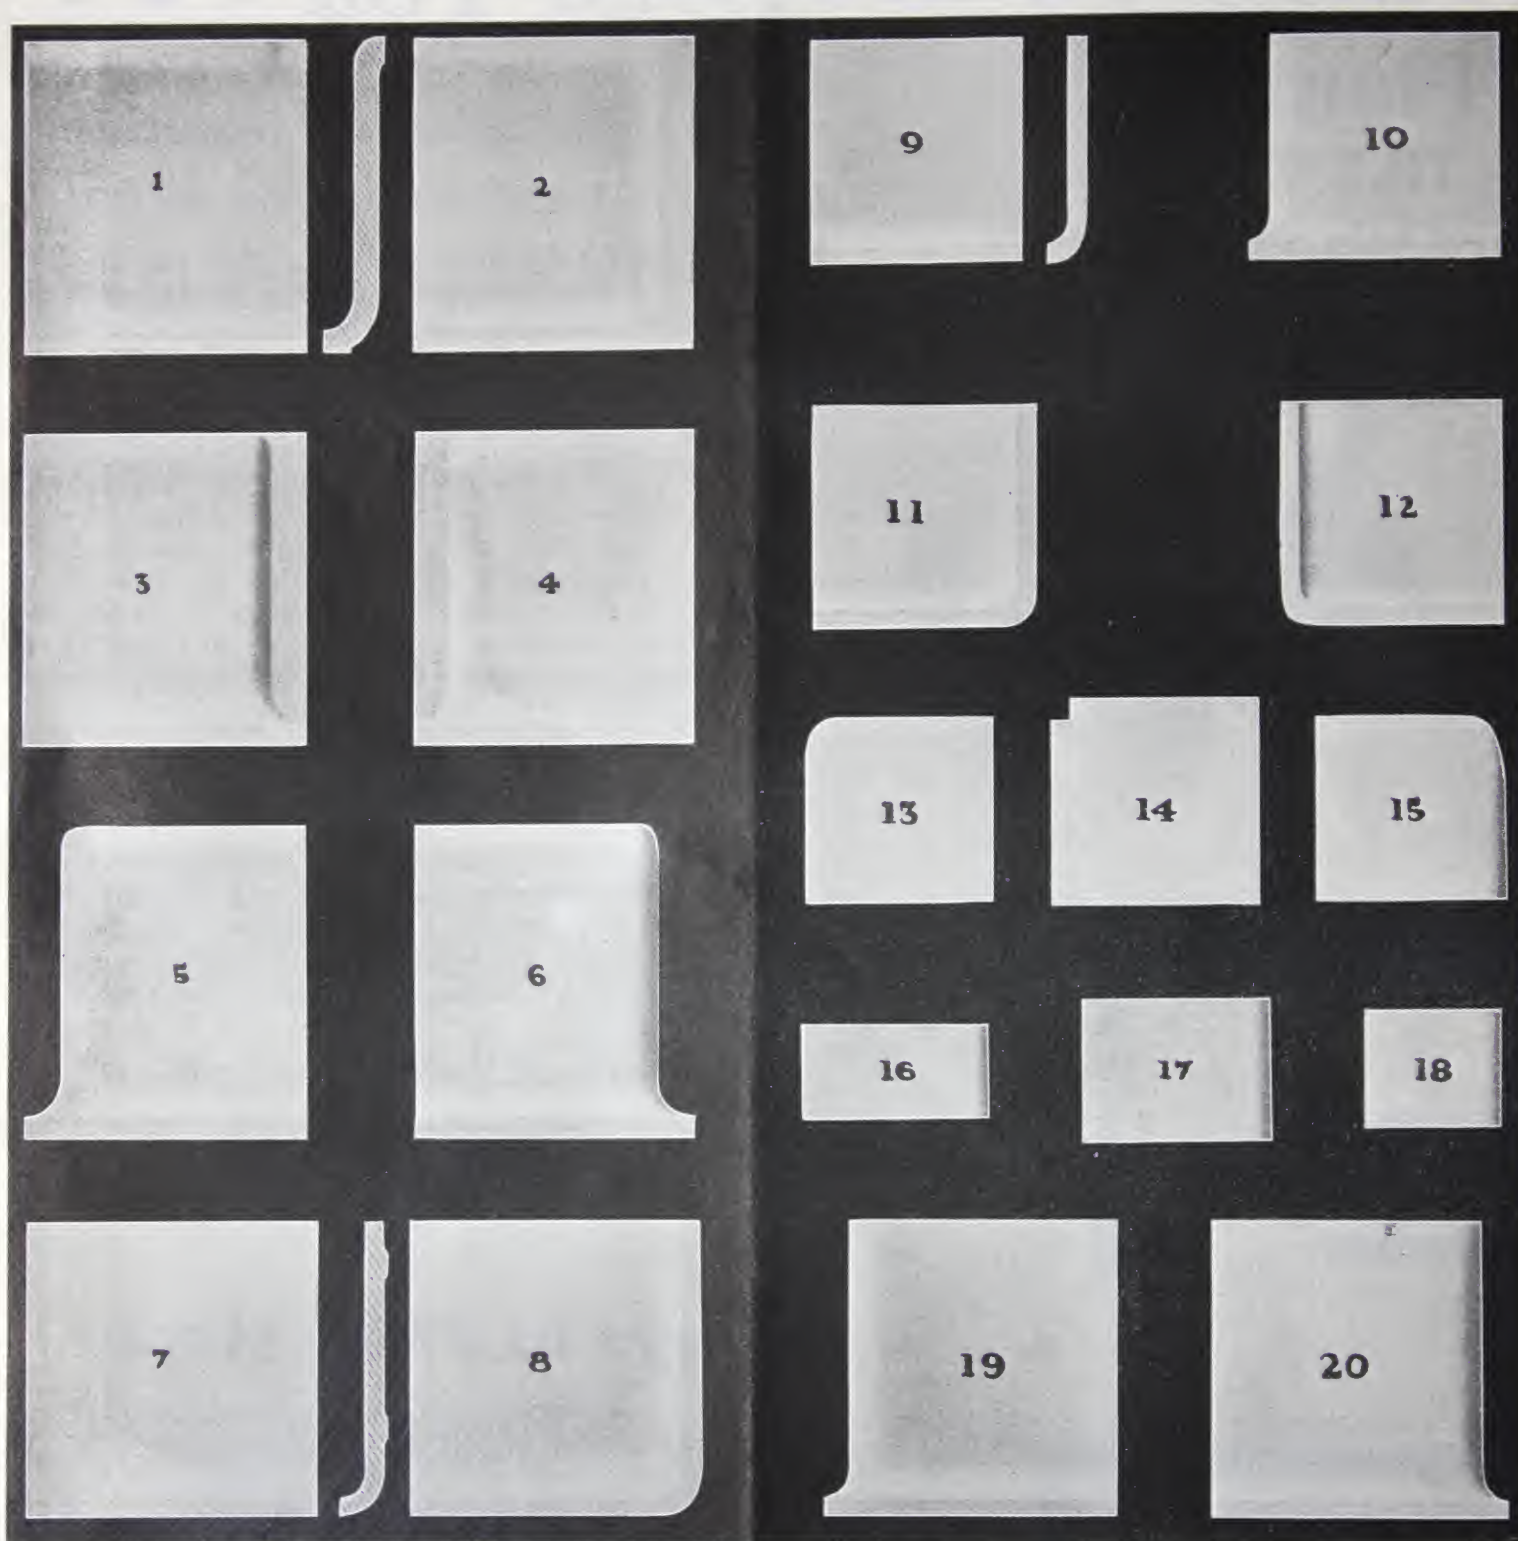

Things to Think About

Don't wait until last minute before placing order. Mail us your order as many days as possible in advance of time your job will be ready for the Tile. You will then be sure to have the Tile on the premises and in readiness to start Tile work at the proper time.

The most and perhaps the only annoying part of building, is the waiting for certain materials as the construction progresses. This causes more expense to say nothing about retarding completion. This can be avoided by allowing ample time in anticipating your Tile requirements as much ahead as possible.

THERE are many styles of Wall Tile Plans, some with one size of Wall Tile, some with another size, some may be worked out with panels, some with one style of cap and base, others with another style of cap and base, etc. The suggestions illustrated on this page are the most popular, especially in jobs where white tile is used for walls. Also same combination may be applied when colored Wall Tile is used.

A ceramic Floor Tile of almost any design shown on following pages would be in good taste with these Wall Tile Combinations.

Style of Wainscot	Style of Cap	Style of Base
No. 1 6x3 White Glazed	6x2 blk.glazed bull nose	6x6 rd top black glaze
No. 2 6x3 " "	6x2 wh.glazed bull nose	6x6 rd top white glaze
No. 3 6x3 " "	6x2 blk.glazed bull nose	6x2 cove base blk. glaze
No. 4 6x3 " "	6x2 black box cap	6x2 cove base blk. glaze
Also 6x 3/4 Plain Colored or Decorative Strips		
No. 5 6x3 White Glazed	6x2 white box cap	6x2 cove base white
No. 6 4 1/4 x 4 1/4 " "	6x2 black box cap	6x6 st top black base
No. 7 4 1/4 x 4 1/4 " "	4 1/4 x 4 1/4 black bull nose	4 1/4 x 4 1/4 st top blk. glaze
No. 8 4 1/4 x 4 1/4 " "	6x2 black box cap	6x6 rd top black glaze

We can at all times furnish White Glazed Wall Tile in grades No. 1 and 2 but grades No. 3 and 4 are not always available. If you happen to be figuring a very cheap and competitive job where a large quantity of the very cheap grades are being proposed, we suggest you write us first as to status.

Tile Drain Board Suggestions FOR KITCHEN SINKS

The above illustration represents the LLOYD Standard Drain Board ten feet in length, the table portion being 20" deep overall and the back and side walls are 14" high overall. We always have in stock, ready for immediate delivery, complete sets of tile necessary to build the identical drainboard shown above. Each set comes packed in one barrel, consisting of following White Glazed Tile:

30 square feet 6 x 3 wall tile
30 pieces 6 x 2 box cap
1 piece left int. corner
1 piece right int. corner
2 pieces down corners
22 pieces 6 x 2 bull nose cap
2 pieces sink corners

In one grade, price only, **\$29.75**

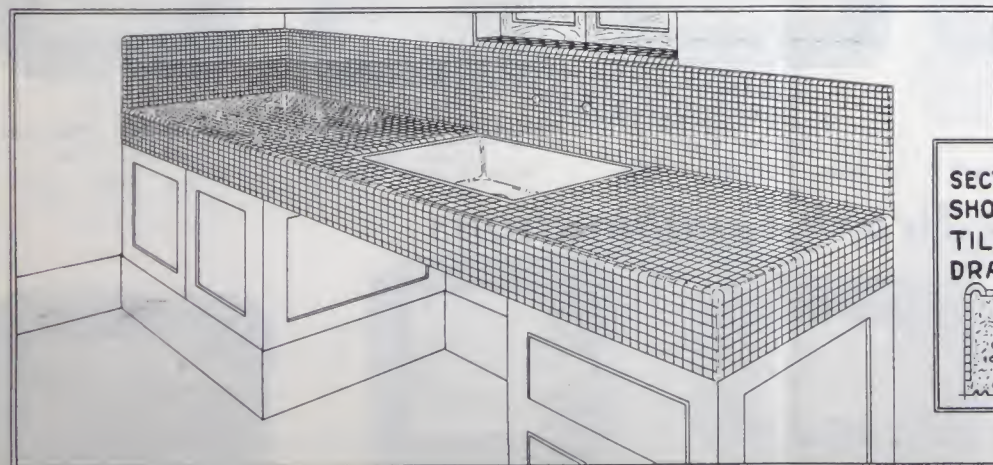

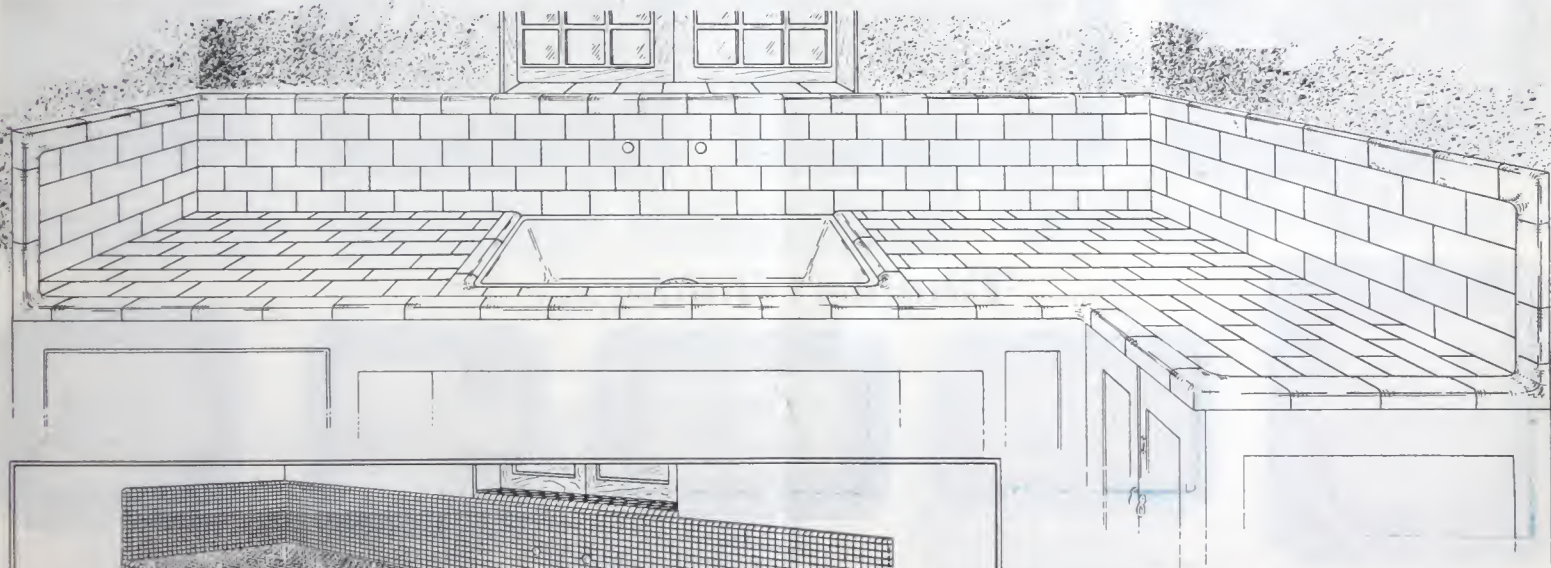

When ordering the complete outfit described simply specify our LLOYD Standard Tile Drain Board.

If desired we can omit eleven feet 6 x 3 glazed wall tile which is amount needed in the table portion, and substitute eleven feet $\frac{3}{4}$ " square unglazed ceramic—some builders prefer the use of unglazed ceramic in the table portion. The price is the same.

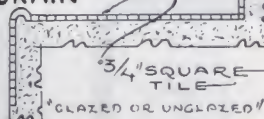

You can make big money in your community specializing in Tile Drain Boards. Builders all want them because they enhance the value of the most modest cottage, to say nothing of their possibilities in the better homes. Don't lose sight of the Tile Drain Board business.

If prices are wanted on all the necessary tile for other styles and sizes of drainboards, do not hesitate to submit sketch or tell us what you want as our estimating department is always at your service without obligation to purchase.

Below we show illustrations of two other types of Tile Drain Boards for Kitchen Sinks

MANTEL TILE

IN MANY COLORS

OUR LARGE selection of MANTEL TILE with many beautiful soft shades and combination of Textures is too numerous to even attempt to illustrate on this page. However, the five numbers shown here are perhaps the most popular and always in demand.

Color No. 159
Brownish Green
Water Falls Texture
Per Square Foot \$1.00

Color No. 157—Mandarin Red With Green
Per Square Foot \$1.10

Color No. 153—Brownish Yellow
Per Square Foot 85c

Color No. 155—Crystal Tan Blend
Per Square Foot 95c

Color No. 161—Pearl Purple
Per Square Foot 70c

In addition to above colors we can also furnish on special order: Flecked Cream, Orange Brown, Brown and Tan Blend, Chocolate, Walnut Brown and Tan Blend, Bronze Green, Medium Blue, Old Rose and Ivory Blend, Slate Gray Blend, Flecked Dark Ivory, Cherry Red, all of which are strong colors, not only used for Mantels, but also suitable for Store Fronts, Lobbies, Soda Fountains, etc. Customers should allow ample time for delivery of Special Order Colors.

The most popular size is $4\frac{1}{4} \times 4\frac{1}{4}$, although we can also furnish 6x6 as well as special shapes.

Ten pieces of as many colors sent as samples upon receipt of \$1.50. This is less than actual cost of tile and handling, to say nothing about postage, but it's the best way for you or your client to select color wanted. With your first order for tile you are permitted to deduct price paid for these samples. You can, thereafter, use these samples over and over when taking orders for tile jobs.

All colored tile is sold subject to the customary variations of color and shade inherent in all burned clay products.

Mantel Tile Furnished in One Grade Only

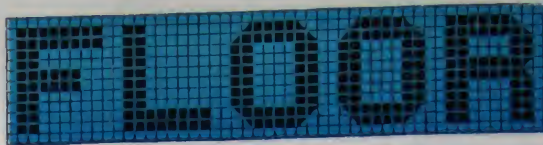

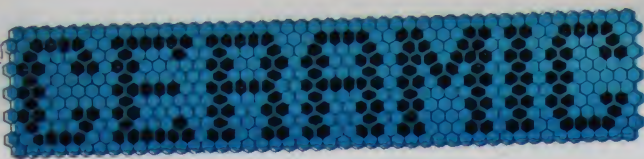

We also have some miscellaneous colors, some very beautiful, at 60c and 65c per square foot.

Bull nose to match for $4\frac{1}{4} \times 4\frac{1}{4}$ size, per piece.....20c to 28c each
Bull nose to match for 6 x6 size, per piece.....30c to 40c each

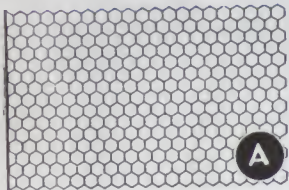

Also Butterflies, Keystones, etc.

Full barrels contain from 40 to 60 feet.

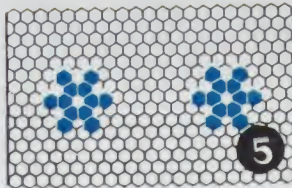

We will ship broken barrels—barrel charge 75c for full or broken.
When ordering Mantel Tile, state color number and size wanted.

MANY SHAPES AND PATTERNS

18B
3/4"x1 1/2" White and Green Basket Pattern

23
1" straight joint square White and Blue Checker Board

CERAMIC Mosaic floor tile, such as shown on this page and several pages following, comes mounted on sheets of paper about 12 by 24 inches so that it simplifies the matter of laying this class of tile.

Prices quoted are positively the lowest—no other tile concern quotes such low prices. Our old customers, of course, know why our prices are so low. To our new friends and customers we take pleasure in explaining that we are enabled to quote the lowest known prices for the following three reasons:

1st—Our large volume. 2nd—Our terms are cash. 3rd—Our low overhead

IN ADDITION to colors shown on this page, we can also furnish the following colors: Old Ivory; Lavender; Dark Blue Gray; Watermelon Green; Powder Blue; Mulberry Brown; Fox Brown; Light Oatmeal; Dark Rose Pink; Salmon Pink; Pale Green; Light, Medium or Dark Orchid. Prices are from 65 cents per square foot up to \$1.25.

Ten pieces actual size $4\frac{1}{4} \times 4\frac{1}{4}$, each piece a different color will be sent as samples upon receipt of \$1.50. This is less than actual cost of tile and handling to say nothing about postage. But, it's the best way for you or your client to select color or wanted. With your first order for tile, you may deduct the amount paid for samples mentioned above. The samples then remain your property free which you can use over and over when taking orders for tile jobs.

CAP, COVE, BASE and all kinds of TRIMMERS as shown on Pages 6 and 7 can be furnished in any of the colors to match your Tile Color Selection. Full Barrels contain about 60 square feet. Barrel Charge 75c whether full or part.

MOST POPULAR SHADES

The Four Colors illustrated on these two opposite pages are shown in actual size of the 4 1/4" x 4 1/4" Wall Tile.

Our colored Wall Tiles need no introduction. They are well known to all good Architects and Tile Contractors. Builders of artistic homes specify LLOYD Tile. They enhance the value of any building.

IN ADDITION to colors shown on this page, we can also furnish the following colors: Flecked Green; Grey Pink; Flecked Mulberry; Olive Green; Lemon Green, Apple Green; Lemon Gray; Lemon Yellow; Ivory Green Blend; Ivory Blue Blend; Ivory Tan Blend; Flecked Light Blue; Flecked Warm Gray; Chinese Mirror Black and Mandarin Red. Prices are from 65 cents per square foot up to \$1.25.

When sending orders for colored Wall Tile, we request our customers to state what their preference of colors would be in the event we are unable to make delivery of color ordered. If color preferences are not mentioned and if we are unable to make delivery of color ordered, we will notify our customers promptly. All colored Tile is sold subject to the customary variations of color and shade inherent in all burned clay products.

CAP, COVE, BASE and all kinds of TRIMMERS as shown on Pages 6 and 7 can be furnished in any of the colors to match your Tile Color Selection. Full Barrels contain about 60 square feet. Barrel Charge 75c whether full or part.

Scioto Brickettes

SCIOTO BRICKETTES are a new product, designed to serve a definite need in a more practical, more economical way. Used as a substitute for brick for wainscoting, they can be laid easier, faster and at lower cost. They can also be used for mantels and for the back of fireplaces. Scioto Brickettes are 8" x 2 1/4" x 1" with fluted backs and are made in four colors — red, buff, grey and ironspot in three grades.

GRADING OF QUARRY TILE

Number 1 Grade of Tile is our highest grade and is "A" grade in every manner. They are carefully sorted as to uniformity of size, shade and shape. This grade represents the best Tile that is commercially possible to produce.

Number 2 Grade is the same as Select, excepting that these Tile are not sorted to any absolute uniform shade. They are "A" grade Tile mechanically.

Number 3 Grade consists of slight irregularities in shape, slightly chipped corners or edges. They are not sorted to uniform shade and you will note from the shading as described above that they are furnished in two shades, Light and Dark Range.

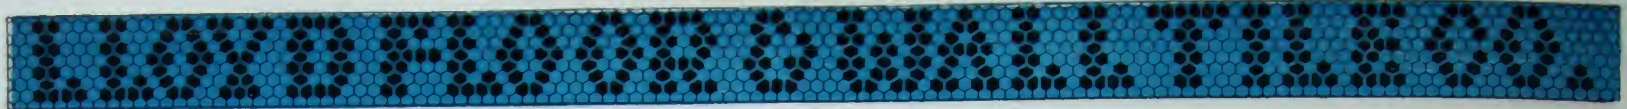

QUARRY TILE FREIGHT RATES

For convenience of our customers, we print below Freight Rates on Quarry Tile from our factory to some of the larger cities.

Page 25

Scioto Navajo Reds

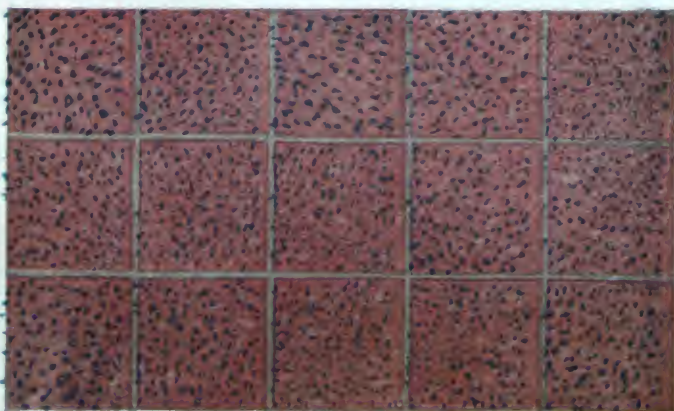

The tiles shown in the pattern at the right are Navajo red—made in three grades and in a full range of sizes.

See Prices on
Page 25

WITH all its richness and mellow beauty, a Scioto Quarry Tile floor has many practical virtues. Mud, water, dust or grime can't harm it. Scuffing, careless feet can't scar it. And it's cleaned in a jiffy. Nor can time dim the glory of its rich, warm colors. In Scioto Quarry Tiles Nature mixes the colors herself into harmonies that retain permanently their original beauty.

NOTHING can equal Quarry Tile for beauty. Certainly nothing for permanence. And, nothing for ultimate economy. Surely, good judgment would seem to dictate the use of Quarry Tile for beauty and practical durability in the kitchen; for distinction and color harmony in the bathroom; for its colorful charm in the sun-room; for the suggestion of welcome in its warm colors for vestibule and hall and for reclaiming valuable space in the basement. Scioto Quarry Tiles come in colors and shades that permit any desired scheme of color treatment.

The pattern at the left shows Scioto Ironspot Tiles, made in three grades and four sizes.

The pattern at the right is Turine blend — a beautiful combination of Indian reds and Orientals.

Page 25

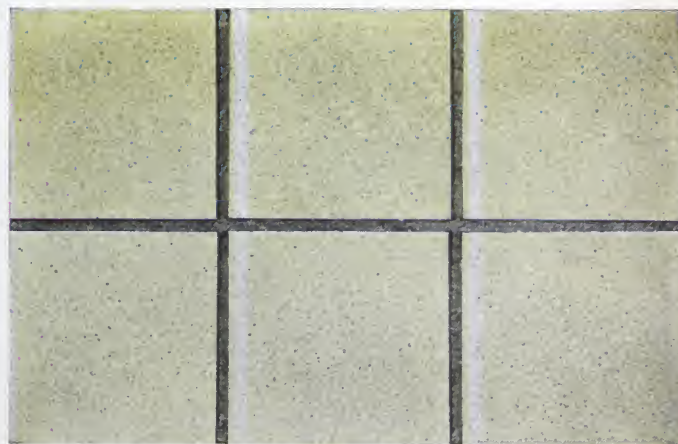

Scioto Quarry Tile

THE full, rich colors of Scioto Quarry Tiles are an inspiration to the designer who seeks distinctive color combinations. While beautiful effects can be obtained with one color, Scioto Tiles are at their glorious best when arranged in designs that take full advantage of the value of contrast.

The pattern shown at right is made up of Scioto Pompeian Buff Tiles, made in three grades and four sizes.

The illustration in the panel above shows a pattern made up of Scioto Travertine Buff. The Travertine is made in three grades and four sizes.

The Scioto Irontone Tiles shown in the panel above are made in three grades and four sizes.

For Random Effects

NATURE'S choicest gift to the home builder. So properly can Quarry Tile be called. The colors in Scioto Quarry Tiles are Nature's own colors. Bright, colorful reds. Reds flecked with dusk blues to produce charming heather effects. Soft, creamy buffs. Airedale tans flecked with deep blues suggestive of warmth and solid permanence. Any effect desired you can secure with Scioto Quarry Tiles. Many strikingly unusual effects can be obtained with broken tile as shown in the illustrations. This treatment is particularly effective for walks and can also be adapted to courts, solariums and gardens.

Scioto Random Red—a combination of Navajo Red and Oriental.

For Prices On
Random

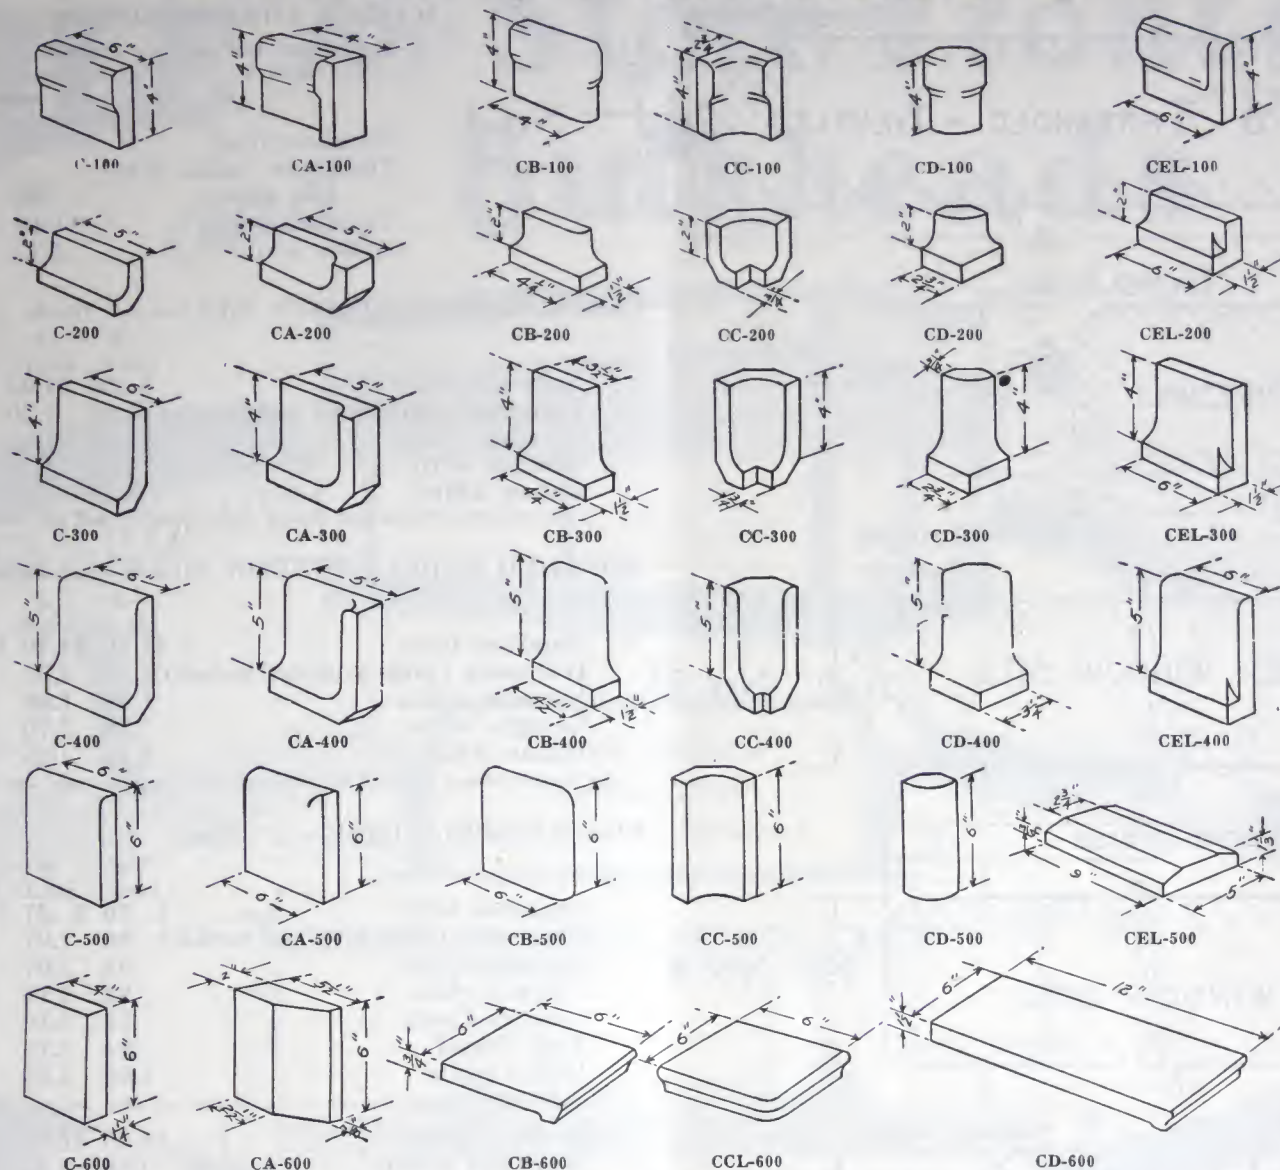

Quarry Tile,
See Page 25

Our Random Quarry Tile is not always furnished in broken pieces. On the contrary, they come to you in full size pieces such as 6x6, 9x9, etc., but, made up of culls, which are not good enough for our No. 3 grade. You then break these up to suit yourself.

The above panel shows Travertine Rubble Random.

Scioto Quarry Trimmers and Shapes

BEAUTY AND SERVICEABILITY *Distinguish* SCIOTO QUARRY TILE

THE thousands of beautiful homes which have gone up during the past few years are eloquent testimony to the desire of Mr. and Mrs. Modern Home Builder to express their ideas, and their individuality in the home they build. And this urge toward self-expression has been one of the principal factors resulting in the creation of homes of beauty and charm.

As home owners and prospective home builders have come to know of the beauties of quarry tile, its adaptability to many uses in and surrounding the home, its ability to withstand years of service without losing its original charm—as home builders have come to know these virtues, quarry tile has increased in popular favor and use. In plain colors and in the many interesting and attractive color combinations possible, quarry tile today is being used to beautify and modernize the kitchen; to introduce the warmth of color into vestibules and hallways and to convert waste-space in basements into cozy, comfortable, livable quarters.

In solariums and conservatories nothing is quite so adaptable, so distinctive, so rich in effect as quarry tile. And even in living and dining rooms of certain types of architecture quarry tile is enjoying a constant-

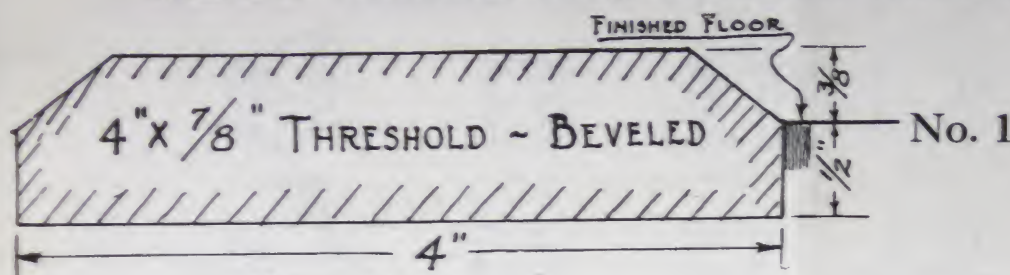

ly increasing popularity. As a medium for attaining interesting and beautiful effects in promenades, drives, walks, terraces and porches, quarry tile has proved a real inspiration for designers and architects. For its beauty of appearance and practical serviceability, quarry tile enjoys a widespread use in hotels, clubs, Y. M. C. A. buildings, schools, hospitals, railway stations and many other types of public and semi-public buildings.

Scioto Quarry Tiles are made in the very heart of a territory famed for the high-grade qualities of its clays. Nature was singularly kind in providing in abundance a variety of clays suitable for the manufacture of clay wares and particularly suitable for the making of Quarry Tiles in shades that produce the most beautiful and artistic effects. The clays from which Scioto Tiles are made blend beautifully and bring out the rich shades in the mixing of different veins. They are refractory to the extent of producing satisfactory ware under the high temperatures necessary to attain bright and distinct shades.

In the production of Scioto Quarry Tiles, the gifts of Nature in the form of ideal clays have been supplemented by a skill that comes only through years of study and experience in producing a finished product of merit.

Steel Bathroom Cabinets

MELVIN

BEAUTIFUL fixtures—exotic color schemes—richness and elegance, but not necessarily extravagance—this combination typifies the modern American bathroom.

No other room in the home is receiving more attention, and no fixture more use than the cabinet, which must serve the dual purpose of beauty and utility. It must harmonize with the rest of the fixtures artistically, at the same time render a practical service and withstand the wear and tear of family life.

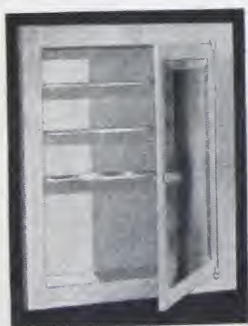

The steel, white enameled cabinet today is standard equipment in the modern bathroom, and facilitates the renting or selling of homes and apartments.

There is no need for architects, builders or contractors to shop around for bathroom cabinets. The Melvin line is complete.

Beauty, durable construction, permanent finish, exclusive features, ease of installation, reasonable prices, and a wide range of models each made in one to four model sizes—here indeed is a combination that is worthy of the consideration of everyone in the building field.

Melvin Steel Cabinets are made to last a lifetime without one cent of cost for upkeep. The exclusive features of construction include sanitary rounded corners, friction catch, sturdy hinges, and crystal glass knob.

1. All corners on the frame are electrically butt-welded. Each joint is fused so thoroughly that two pieces become as strong as one solid plate.
2. Heavy mirrors are supplied plain or with a beautiful one-inch bevel cut into the plate.
3. The rust-proof hinges are practically unbreakable (a 200-pound man has tested them by swinging on the door). (Patent pending on these unique features).
4. The crystal glass knob is very distinctive. An invisible cushion of rubber separates the knob from the door.
5. Note the friction catch, which is easily workable and holds the door securely in place.
6. The rust-proof brackets are die-cast and permanently fastened in the sides of the cabinet.
7. All Melvin models are furnished with either enameled steel or plate glass, removable shelves.
8. Sanitary rounded corners (an exclusive Melvin feature) allow no opportunity for dirt to collect in inaccessible points.
9. High gloss enamel finish sprayed and permanently baked on.
10. Cabinets are 5" deep overall; frame has 1" return flange. All parts of body are electrically spot welded.

MODEL "A" This model meets the popular demand for a neat, compact bathroom cabinet. It is made in four standard sizes and has typical first class construction and finish, four roomy shelves, French plate mirror, plain or beveled, and all of the modern refinements so distinctively Melvin. This is an excellent cabinet for bathrooms in every type of home, is reasonably priced and will give years of economical service.

Mirror Size	Price	
	Plain Mirror	Double Mirror
10" x 14"	\$ 8.80	\$ 9.30
12" x 16"	9.55	10.15
14" x 18"	10.35	11.10
16" x 20"	11.60	12.40

MODEL "B" Because of the convenient open shelf, this model is being installed in thousands of bathrooms. The cabinet has three additional shelves, thus providing ample room for accommodating the needs of the average family. It is used extensively in residences, apartments, apartment hotels and hotels, and is very reasonably priced. This model is made in four standard sizes, so that the buyer may choose the one which best suits any particular bathroom.

Mirror Size	Price	
	Plain Mirror	Double Mirror
10" x 14"	\$ 9.20	\$ 9.65
12" x 16"	10.00	10.60
14" x 18"	10.90	11.60
16" x 20"	12.30	13.10

MODEL "K" The "Vanitie Venetian", rich in design, graceful of line and distinctive in beauty, instantly appeals to everyone desiring a final touch of elegance in the bathroom. The artistically etched mirrors, the movable wings, the concealment of the cabinet, the full 3-way visor all combine to bring about an exceedingly pleasing effect. An exclusive feature is a patented cushioned door designed to prevent breakage.

Mirror Size 18" x 32"

Price \$80.00

MODEL "F" This truly beautiful cabinet has found favor because its distinctive lines follow the modern trend to beautify the bathroom.

The large mirror, which completely conceals the cabinet, appeals particularly to women because it may be used as a dressing mirror. An exclusive feature is a patented cushioned door designed to prevent breakage.

Mirror Size	Price	Mirror Size	Price
18" x 26"	\$26.80	20" x 28"	29.90
18" x 32"	29.55	20" x 34"	33.40

MODEL "H" The Melvin "Georgian" Bathroom Cabinet has been designed in response to a demand for a model that would fit in between the standard style cabinets Models A and B, and the beautiful "Venetian," Model F. The "Georgian" meets the growing demand for all-mirror door cabinets and has throughout the high quality construction and finish that is characteristic of Melvin manufacture. The "Georgian" is made in one size only—16" x 20" beveled mirror, with slightly rounded corners, and decorated with four silver plated rosettes. The mirror can be furnished with or without etching. An exclusive feature is a patented cushioned door designed to prevent breakage.

Mirror Size 16" x 20"

Price \$12.85

RADIA ELECTRIC WALL TYPE HEATERS FOR BATHROOMS, BEDROOMS, DRESSING ROOMS AND NURSERIES

Listed as Standard by Underwriters' Laboratories

Radia Wall Heaters are ideal for bath rooms, dressing rooms and hard-to-heat corners.

RADIA Wall Insert Heaters are ideal for bedrooms, bathrooms, breakfast-rooms, kitchens, solariums or in fact, in any room where instant heat is desirable. They are intended for permanent installations and being set in the wall no space is sacrificed, making them particularly desirable for nooks and small rooms where space is limited.

The face plate and guard are perfectly flat and when installed fit flush with the wall.

In this type heater, two Globar Elements are mounted horizontally in front of a highly polished nickel reflector. As is characteristic of the Globar Elements, they are mounted in free air, being suspended only at the extreme ends. This allows for a maximum amount of radiation surface. As there is no clay or refractory backwall in the "Radia" Heater, its action in producing heat is instant and also eliminates the loss or dissipation of heat through such parts.

Behind the nickel reflector and the asbestos lined box, there are about 400 cubic inches of air space. Thirty seconds after the switch has been turned on, 100% of the current consumed is being converted into clean, odorless heat, the greater portion of which is concentrated directly into the room by convection and reflection. The heat transmitted into the back chamber of the heater passes upward and out through the top row of vent holes in the face plate. This action causes cold air to be drawn in through the bottom row of vent holes. Consequently, all heat produced by the "Radia" Heater passes directly into the room. All "Radia" Wall Heaters are equipped with removable protective guards which permit accessibility to the Globar Heating Elements, which are as quickly replaced as a "snap-in" fuse.

Specifications

Face.....15½" H x 16¼" W
Insert Box.....13¾" x 13¾" x 3½"
Opening Required.....14" x 14" x 3½"

Only when you actually need heat should the current be turned on, for as before explained, a generous supply of heat is available thirty seconds after the switch has been turned on. This feature makes possible notable economies. "Radia" Wall Type Heaters used as auxiliaries to the main heating plant in rooms where a body temperature is desired, save money because the furnace may be used less. On cool spring or fall days, the furnace may be entirely eliminated and "Radia" Heaters can be depended on to furnish the necessary heat at the desired time.

The standard "Radia" Wall Insert Heaters are finished in a white vitreous porcelain enamel although they can be furnished, at a slight additional cost, in black, canary yellow, sky blue, ivory, mahogany, walnut or almost any finish to match or harmonize with the interior decorations of a room.

"Radia" Wall Heaters installed in new homes whether built for sale or privately owned, add greatly to their comfort and value. The leading architects, building contractors and electrical contractors are specifying and using "Radia" Wall Insert Heater.

Special color enamels at slight additional cost.

SHINE-ALL CLEANER AND PRESERVER

SHINE-ALL is an efficient trade marked chemical cleanser, contains no harmful agents such as alkali, ammonia, lye or caustics and is ideal for the cleaning and maintenance of tile and terrazzo floors. Especially used on new Tile Floors after completed.

SHINE-ALL eliminates the greasy scum and dust collecting surface that is left on tile, marble and terrazzo when they are cleaned with cheap soaps.

SHINE-ALL also does away with the dusty appearance that a floor of this nature has after being cleaned with a powder. On both terrazzo and tile SHINE-ALL rejuvenates and preserves the beautiful original colors of the flooring materials.

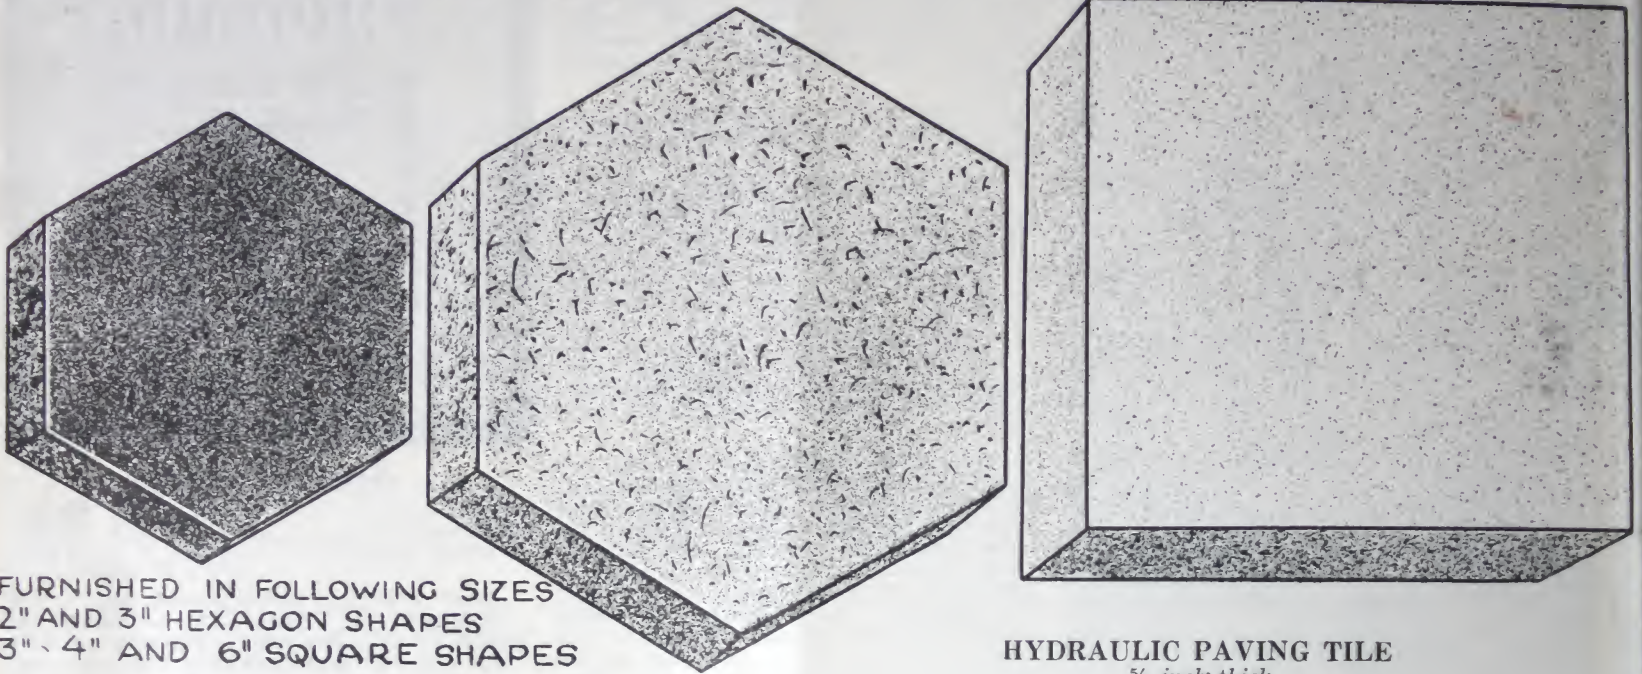

At each cleaning operation SHINE-ALL deposits a slight preservative sheen on the floors and produces a non-slippery, protective surface which polishes readily and enhances the beauty of the floor, at the same time preventing it from becoming easily stained.
